RIFM’s Streamlined Safety Assessment Process

Initial Situation:
- Slow moving Safety Assessment process
- Low number of assessments completed
- Growing Safety Assessment backlog
- External commitments to stakeholders
- Lack of transparency in existing processes
- High process complexity
- Low process management maturity
- New RIFM staff

Strategy
- Strategy review
- Identification of process challenges
- Focus on strategy people, process and technology

End-to-end process documentation
- Understanding of existing processes
- Transparency across endpoints
- Accessible for all RIFM staff

Short- and long-term improvement ideas
- Work packages and implementation roadmap
- New sub-processes
- New Key Performance Indicators (KPIs)

Quick improvement results
- Increased process capacity by over 300%
- Increased process efficiencies
- Streamlined inter-enterprise processes
- Documented end-to-end processes
- New performance management framework
- New process and performance culture
- New process management roles and tools
